

Henry Peralta Briceño

Full Stack Web Developer

I have experience in Web Development both on the BackEnd side, and on the FrontEnd side. I have knowledge in JavaScript, HTML, CSS, Node, React, Redux, SQL, Bootstrap, GitHub, agile methodologies (SCRUM), among others. Currently, I have an intermediate level of English (B2) and thanks to my previous experience in other areas (construction, food and sales), I can provide a broader vision of what a client may need. I like constant learning, implementing and optimizing processes in order to give more optimal results.

PROJECTS

Portfolio. (02/2023 - 02/2023) [🔗](#)

- I consolidated my knowledge in HTML and CSS.
- I modified and added functionalities to a template such as: the contact icons, the mailing form and the CV download.

Food-App. (01/2023 - 01/2023) [🔗](#)

- I learned a new front-end framework (Bootstrap) to apply styles to this project.
- I worked on improving the modularization of folders and files.

Poke-App. (02/2023 - 02/2023) [🔗](#)

- I learned the basics of TypeScript (programming language) to use in this practice project.
- I implemented styles with SCSS.modules.

EasyOrder-App for restaurants. (08/2022 - 11/2023) [🔗](#)

- I suggested, promoted and introduced new tools to my work team for the development of the project.
- I created key components for the operation of the App.
- I experimented and adapted to situations in a real teamwork environment.
- I supported my teammates when I had knowledge about something they didn't.

Countries-APP. (06/2022 - 08/2022) [🔗](#)

- I created my first app from scratch.
- I applied my knowledge to create a database.
- I created a server.
- I created the user interface.
- I optimized with some tools, including Redux-ToolKit, which facilitates the interaction of information between components.
- I created all the routes from the back side, to facilitate the requests for information from the front side.
- I strengthened my knowledge in the field of Web Development.
